

# Horse Vaccination Information Now Included on RÁS:

We would like to inform trainers and secretaries that horse vaccination data is now included on RÁS.

This information is designed to be an aid to assist trainers and secretaries in the management of horse's vaccinations and so we are introducing vaccination notices at some key points i.e.

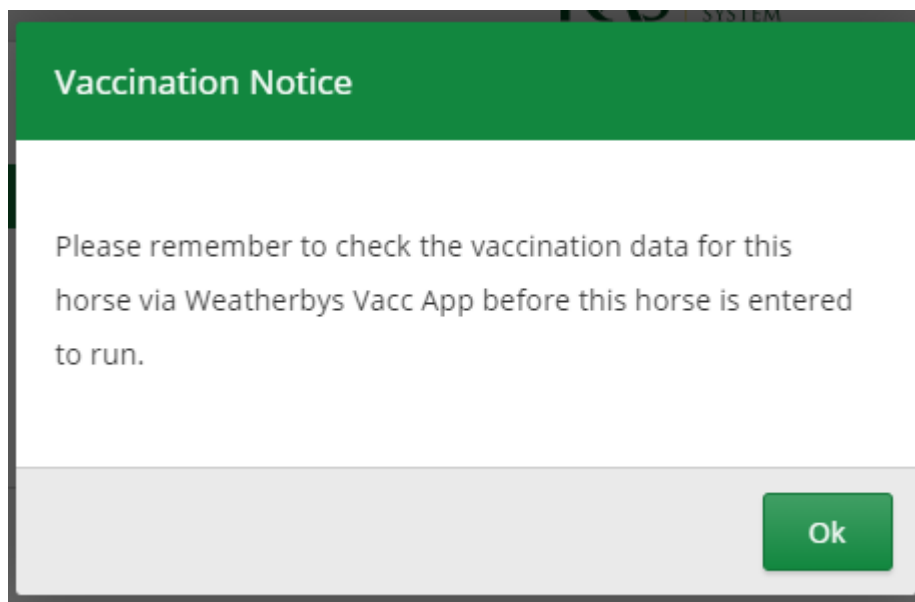

- Returning horses in training
- Making an entry
- Making a declaration

At these stages, you will receive a notice or warning on screen, depending on the vaccination status of that horse, to remind you immediately of the action required so that you can be qualified to race under IHRB rules relating to vaccinations (Rule 91).

## ***Return In Training: (Vaccination Notice is Informational only)***

At the end of the return in training process, a notice will appear to inform you of the horse's current vaccination status, for example:

- 1) Green Banner - The vaccination record for this horse is in order ***at this point in time*** but is reminding you to keep vaccinations in date before entering into races in the future.

- 2) Amber Banner - The vaccination record is not in order **at this point in time** – in this example the vaccination history for this horse is not uploaded and authorised and so is reminding you to get the vaccinations in order before entering into races in the future.

### Vaccination Notice

Please note this horse does not have a vaccination history uploaded – Vaccinations should be updated via Weatherbys Vacc App before this horse is entered to run.

Ok

### ***Make An Entry: (Vaccination Notice is Informational only)***

When the Entry Confirmation modal pops up on screen, a notice will appear at the bottom to inform you of the horse's current vaccination status, for example:

- 1) Green Banner – The vaccination record for this horse is in order ***at this point in time*** but is reminding you to keep vaccinations in date (check updates after this point don't contravene Rule 91) before declaring.
